

AVerTV Hybrid Volar HX

The best-selling USB Dongle for Windows 7 Ready!

AVerMedia AVerTV Hybrid Volar HX, the best-selling USB dongle, has been certified Windows 7 Media Center Additional Qualification and also releases the in-box driver to be able to automatically run under Windows 7 Media Center platform. With the official in-box driver launch, AVerTV Hybrid Volar HX can further integrate the PCTV entertainment to the upcoming Windows 7 Media Center platform. Namely, users can directly enjoy TV and multimedia functions under “My TV” of Windows 7 computers without the need of installing any extra software.

AVerTV Hybrid Volar HX is one of the best selling USB dongle of digital TV (DVB-T), worldwide analog TV, and FM radio access. The High Gain Antenna shipping with AVerTV Hybrid Volar HX equips superior DVB-T signal reception quality for better TV watching experience. Users can experience HDTV (MPEG-2/H.264) programs with a sharp and smooth video quality. The solid hardware design plus in-box driver make AVerMedia the first PCTV choice for Windows 7 users.
