

How to set up my NAS easily with ER330?

Export /Import the NAS file.

Step1: Enter Network Location and account password menu.

Step2: Press [F1], export the NAS configuration file.

Step3

Create a shared folder.

Shared folders are the basic directories where you can store and manage files and folders on your Synology NAS. Before storing any files, you'll need to create a shared folder.

Step4

You have to create the new folder on your NAS, and please make it to share.

Input the following:

- "xxx.xxx.x.x/ shared folder" Name
- your account name (NAS)
- your password (NAS)

```
{  
    "id": 1,  
    "url": "//192.168.1.121/ER330",  
    "username": "admin",  
    "password": "admin"  
}
```

How to share the folder, you could refer this link:

https://kb.synology.com/en-sg/DSM/help/DSM/AdminCenter/file_share_create?version=6

Refer site: Create a Shared Folder | DSM - Synology Knowledge Center

Step5

Press[F2] to import the NAS configuration file.
