

How to zoom the image in conferencing apps like Google Meet, Zoom, Teams, etc.?

1. Visit the download page of video bar. Download and install the software application, AVerMedia Connect: [Connect | AVerMedia](#)
2. Install and then launch the Connect application. Once it is on, check the zoom setting on top. Turn off AI Framing first.

3. Now the zoom function is available. You may move the bar under the image to zoom in or out. The image will be changed simultaneously in the conferencing app in use, where its camera is set to this video bar.
